

HOW TO ARRIVE TO THE HYDRODYNAMIC PLANT OF PORTO VECCHIO

BY BUS AND BY FOOT

Bus n. 6 or n. 36, from the city center direction "Grignano" / "Bivio di Miramare". Get off the bus at the fourth stop after the Railway Station of Piazza Libert , in Viale Miramare, where the Salita Madonna di Gretta begins, immediately before a clearly visible iron railway overpass. Cross the road and go under the overpass. Immediately after the overpass, on the left, a well-visible pedestrian gate will allow you to access the Porto Vecchio district immediately on the back of the Plant (beware, for a short tract of rough terrain). See the blue path on the 3D image on the next page

BY CAR

Coming from the city center continue from the Central Station to Viale Miramare for about two kilometers. When you reach a junction with the indication "Porto Vecchio" take it on the left and continue to the left for about 300 meters. You will reach the square with ample free parking, in front of the Plant. Coming from the coast road that leads from Sistiana to the city center, past Barcola continue to Viale Miramare until you reach the junction and enter in Porto Vecchio. See the red path in the 3D image on the next page
